Engineering Portfolio

Summary

Recent B.Tech graduate in Artificial Intelligence Data Science with hands-on experience in Software Development, Full Stack Development, Python, Java, and AI/ML through internships and academic projects. Proficient in building responsive web applications, developing RESTful APIs, working with databases, and implementing machine learning solutions using modern technologies. Experienced with React.js, JavaScript, Node.js, Express.js, MongoDB, SQL, Python, and Git. Strong foundation in Data Structures Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, and Computer Networks. Passionate about designing scalable software solutions, solving real-world problems, and delivering high-quality, user-centric applications through clean, efficient, and maintainable code.

Education

Ramachandra College of Engineering, Eluru (JNTUK)

2022 – 2026

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.5/10

Internships

Software Development Intern

Jan – Apr 2025

StudyOwl Education Pvt Ltd

- Developed REST APIs, authentication modules, and backend services using Node.js, Express.js, and MongoDB.

Software Engineering Intern

May – Jun 2025

SmartBridge (Remote)

- Built Python-Flask applications, automation workflows, REST APIs, and data processing solutions.

Machine Learning Intern

May – Jun 2024

Blackbucks (Remote)

- Performed data preprocessing, feature engineering, and machine learning model evaluation using Python.

Projects

CareerOS – AI-Powered Career Intelligence Platform (GitHub)

2025 – Present

React.js · FastAPI · Python · MongoDB · Gemini AI

- Built an AI-powered career intelligence platform for ATS resume analysis, GitHub profile evaluation, career recommendations, and interview preparation.
- Developed scalable REST APIs, AI-driven scoring engines, and personalized career insights using FastAPI, MongoDB, and Gemini AI.

Final Year Project: Smart Leave Management System

2026

Microsoft Power Apps · Power Automate · Process Automation

- Developed a leave management system with employee authentication, leave request tracking, approval workflows, and automated notifications using Microsoft Power Apps and Power Automate.
- Streamlined leave processing through workflow automation, improving operational efficiency and reducing manual administrative effort.

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

Frontend Development: React.js, HTML5, CSS3, Responsive Web Design, UI Development

Backend Development: Node.js, Express.js, FastAPI, REST APIs, API Integration

Databases: MongoDB, MySQL

AI/ML Data Science: Machine Learning, Deep Learning, TensorFlow, Scikit-learn, Pandas, NumPy, Data Analysis

Tools Platforms: Git, GitHub, VS Code, Postman, Jupyter Notebook, Vercel, Render

Core Computer Science: Data Structures Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Software Engineering: SDLC, Debugging, Version Control, Technical Documentation, Problem Solving

Achievements

- Built and deployed multiple full-stack and AI-powered applications using React.js, Node.js, Python, FastAPI, MongoDB, and Google Gemini AI.
- Completed industry-focused internships in Software Development, Machine Learning, and Full Stack Engineering, gaining hands-on experience in building scalable applications and AI-driven solutions.

Certifications

- Certified in C, Java, Python, Machine Learning, Artificial Intelligence Fundamentals, MongoDB, React.js, Full Stack Web Development, and AWS Cloud Fundamentals.
